---

Bob,

Could you provide a peer review for the draft of AECI's New Madrid Power Plant? It's a Part 70 renewal. Alana is the author of the draft but turned the project over to me due to her workload. She ran into an issue with the CyClean additive that is used to reduce mercury emissions from the combustion of the coal. I've uploaded a zip file to the FTP server that has all of the files that Alana has been working with. The draft itself is located in the zip file in a folder names "Drafts", and has a date modified of "9/25/2019." There is also an issue with a RICE engine used as a fire pump engine that I need to get more information about, but with a draft of about 155 pages, there's already a bunch of other stuff there – I'll get the RICE engine info and put that in. If you need more information, or feel that the draft isn't yet ready for peer review, please let me know.

Thank you,

Michael J. Stansfield, P.E.
